## PRECAUTIONS

Ensure that the AC power supply in your house complies with the identification sticker located on the back of your player. Install your player horizontally, on a suitable base (furniture), with enough space around it for ventilation (3~4 inches). Make sure the ventilation slots are not covered. Do not stack anything on top of the player. Do not place the player on amplifiers or other equipment which may become hot. Before moving the player, ensure the disc tray is empty. This player is designed for continuous use. Switching off the DVD player to the stand-by mode does not disconnect the electrical supply. In order to disconnect the player completely from the power supply, remove the main plug from the wall outlet, especially when left unused for a long period of time.

During thunderstorms, disconnect the AC main plug from the wall outlet. Voltage peaks due to lightning could damage the unit.

Do not expose the unit to direct sunlight or other heat sources. This could lead to overheating and malfunction of the unit.

Protect the player from moisture (i.e. vases), and excess heat (e.g. fireplace) or equipment creating strong magnetic or electric fields (i.e. speakers...). Disconnect the power cable from the AC supply if the player malfunctions. Your player is not intended for industrial use. Use of this product is for personal use only.

Condensation may occur if your player or disc has been stored in cold temperatures. If transporting the player during the winter, wait approximately 2 hours until the unit has reached room temperature before using.

The batteries used with this product contain chemicals that are harmful to the environment.

Do not dispose of batteries in the general household trash.

This section involves various methods of connecting the Digital Home Theater to other external components. Before moving or installing the product, be sure to turn off the power and disconnect the power cord.

## CONNECTING THE SPEAKERS

### Position of the DVD Player

Place it on a stand or cabinet shelf.

### Selecting the Listening Position

The listening position should be located about 2.5 to 3 times the distance of the TV's screen size away from the TV.

Example : For 32" TV's 2~2.4m (6~8feet)

For 55" TV's 3.5~4m (11~13feet)

### Front Speakers **L R**

Place these speakers in front of your listening position, facing inwards (about 45°) toward you.

Place the speakers so that their tweeters will be at the same height as your ear.

Align the front face of the front speakers with the front face of the center speaker or place them slightly in front of the center speakers.

### Center Speaker **C**

It is best to install it at the same height as the front speakers. You can also install it directly over or under the TV.

### Rear Speakers **SL SR**

Place these speakers behind your listening position. If there isn't enough room, place these speakers so they face each other. Place them about 60 to 90cm (2 to 3feet) above your ear, facing slightly downward.

★ Unlike the front and center speakers, the rear speakers are used to handle mainly sound effects and sound will not come from them all the time.

★ Sound will be heard from the rear speakers in DVD 5.1-CH or Dolby Pro Logic II mode only.

### Subwoofer **LFE**

The position of the subwoofer is not so critical. Place it anywhere you like.

# connections

## Connecting the Front, Rear, Center and Subwoofer Speakers

- ❗ Do not let children play with or near the speakers. They could get hurt if the speaker falls.
  - When connecting the speaker wires to the speakers, make sure that the polarity (+/-) is correct.
  - Keep the subwoofer speaker out of the reach of children so as to prevent them from inserting their hands or alien substances into the duct (hole) of the subwoofer speaker.
  - Do not hang the subwoofer on the wall through the duct (hole).
- 
- 📺 If you place a speaker near your TV set, screen color may be distorted because of the magnetic field generated by the speaker. If this occurs, place the speaker away from your TV set.

## CONNECTING THE WIRELESS RECEIVING AMPLIFIER

### Wireless Receiving Module (SWA-4100)

1. Connect the front, Center and Subwoofer speakers to the DVD Player, referring to pages 23~24.
2. With the DVD Player turned off, insert the TX card into the TX Card Connection (WIRELESS) on the back of the main unit.
  - Hold the TX card so that the slanted side faces to the left and insert the card into the port.
  - The TX card enables communication between the main unit and the wireless receiver.
3. Connect the left and right rear speakers to the wireless receiving module.
4. Plug the power cord of the wireless receiving module in the wall outlet

- HT-Z420/TZ422/TZ425 doesn't have rear speaker connectors on the main unit. The rear speakers are connected to the Wireless module.
- The rear speakers for HT-Z320/TZ322/TZ325 can also be connected to the Wireless module (SWA-4100) if you purchase it separately.

- The HT-Z420/TZ422/TZ425 only can connect with wireless receiving module (SWA-4100).**

# connections

---

- Place the wireless receiver module at the rear of the listening position. If the wireless receiver module is too close to the main unit, some sound interruption may be heard due to interference.
- If you use a device such as a microwave oven, wireless LAN Card, Bluetooth equipment, or any other device that uses the same frequency (2.4GHz) near the system, some sound interruption may be heard due to interference.
- The transmission range from the main unit to the wireless receiving module is about 33 feet (10m), but may vary depending on your operating environment. If a steel-concrete wall or metallic wall is between the main unit and the wireless receiver module, the system may not operate at all, because the radio wave cannot penetrate metal.
- If the main unit doesn't make wireless connection, the system needs ID Setting between main unit and wireless receiver module. With the main unit turned off, press the remote control's number button buttons "0"→"1"→"3"→"5" and the main unit will turn on. With the wireless receiver module turned on, press "ID SET" button on the back of the unit for 5 seconds.

- Do not insert any other card except the provided TX card.  
If a different TX card is used, the product may be damaged or the card may not be removed easily.
- Do not insert the TX card upside down or in the reverse direction.
- Insert the TX card when the DVD Player is turned off. Inserting the card when it is turned on may cause a problem.
- If the TX Card is inserted and wireless receiving module setting is complete, sound is not output from the Rear Speaker connectors on the main unit.
- The wireless receiving antenna is built into the wireless receiver module. Keep the unit away from water and moisture.
- For optimal listening performance, make sure that the area around the wireless receiver module location is clear of any obstructions.
- **If no sound is heard from the wireless rear speakers, switch the mode to DVD 5.1 channel or Dolby ProLogic II .**
- In 2-CH mode, no sound will be heard from the wireless rear speakers.

## CONNECTING THE VIDEO OUT TO YOUR TV

Choose one of the three methods for connecting to a TV.

### METHOD 1 : HDMI(Best)

Connect the HDMI cable (not supplied) from the HDMI OUT jack on the back of the DVD Home Theater to the HDMI IN jack on your TV. HDMI enables you to view movies in High Definition on your HDTV.

### METHOD 2 : Component Video(Better)

If your television is equipped with Component Video inputs, connect a component video cable(not supplied) from the Component Video Output (Pr, Pb and Y) Connectors on the back of the main unit to the Component Video Input Connectors on your TV.

### METHOD 3 : Composite Video(Good)

Connect the supplied video cable from the VIDEO OUT jack on the back of the main unit to the VIDEO IN jack on your TV.

- Resolutions available for the HDMI output are 480p, 720p, 1080i/1080p. See page 29 for resolution setting.
- This product operates in Interlace scan mode (480i) for Component Output.
- After making the video connection, set the Video input source on your TV to match the corresponding Video output (HDMI, Component or Composite) on your Home theater. See your TV owner's manual for more information on how to select the TV's Video Input source.
- If you use an HDMI cable to connect a Samsung TV to the main unit, you can operate the Home Theater using the TV's remote control. (This is only available with SAMSUNG TV's that support Anynet+(HDMI-CEC).)
- If your TV has the **Anynet+** logo, then it supports the Anynet+ function.

## HDMI Auto Detection Function

---

The player's video output will automatically change to HDMI mode when connecting an HDMI cable while power is on. For possible HDMI resolutions, see page 29.

- **HDMI (High Definition Multimedia Interface)**

HDMI is an interface that enables the digital transmission of video and audio data with just a single connector. Using HDMI, the DVD Home Theater transmits a digital video and audio signal and displays a vivid picture on a TV having an HDMI input jack.

- **HDMI connection description**

HDMI connector - Supports video and digital audio data.

- HDMI outputs only a pure digital signal to the TV.

- If your TV does not support HDCP (High-bandwidth Digital Content Protection), random noise appears on the screen.

- **Why does Samsung use HDMI?**

Analog TV's require an analog video/audio signal. However, when playing a DVD, the data transmitted to a TV is digital. Therefore either a digital-to-analog converter (in the DVD Home Theater) or an analog-to-digital converter (in the TV) is required. During this conversion, the picture quality is degraded due to noise and signal loss. HDMI technology is superior because it requires no D/A conversion and is a pure digital signal from the player to your TV.

- **What is the HDCP?**

HDCP (High-band width Digital Content Protection) is a system for protecting DVD content outputted via HDMI from being copied. It provides a secure digital link between a video source (PC, DVD, etc) and a display device (TV, projector, etc). Content is encrypted at the source device to prevent unauthorized copies from being made.

- **What is Anynet+?**

Anynet+ is a convenient function that offers linked operation of this unit through Samsung TV's with the Anynet+ feature.

- If your Samsung TV has an  logo, then it supports the Anynet+ function.

- If you turn on the player and insert a disc, the player will start playing the disc, and the TV will turn on automatically and switch to HDMI mode.

- If you turn on the player and press the Play button with a disc already inserted, the TV will immediately turn on and switch to HDMI mode.

## HDMI FUNCTION

### Resolution Selection

This function allows the user to select the screen resolution for HDMI output.

In Stop mode, press and hold the **SD/HD** (Standard Definition/High Definition) button on the remote control until the resolution changes.

- Resolutions available for the HDMI output are 480p, 720p, 1080i/1080p.
- SD(Standard Definition) resolution is 480p and HD (High Definition) resolution is 720p, 1080i/1080p.

- If the TV does not support the configured resolution, you will not be able to see the picture properly.
- When a HDMI cable is connected, composite(Video) and component video signals are not output.
- See your TV owner's manual for more information on how to select the TV's Video Input source.

#### Why use HDMI (High Definition Multimedia Interface)?

This device transmits a DVD video signal digitally without the process of converting to Analog. You will get sharper digital pictures when using an HDMI connection.

### BD Wise (Samsung products only)

You can select to use the BD Wise menu only if the Samsung home theater is connected to a Samsung TV that supports BD Wise using an HDMI cable.

#### • What is BD Wise?

BD Wise automatically adjusts BD Wise-compliant Samsung products to the optimal settings between them. This feature is enabled only if BD Wise-compliant Samsung products are connected to each other using an HDMI cable.

#### • To use BD Wise

1. Use an HDMI cable to connect the Samsung home theater to a BD Wise-compliant Samsung TV.
2. Set each BD Wise menu of the Samsung home theater and the Samsung TV to On, respectively.
  - This will optimize the picture quality according to the content (In the disc, DVD, etc) that you want to play.
  - This will also optimize the picture quality between the home theater and your BD Wise-compliant Samsung TV.

- If you want to change the resolution in BD Wise mode, you must set BD mode to Off in advance.
- If you set the BD Wise mode to off, the resolution of the connected TV will be adjusted to its maximum resolution automatically.
- BD Wise will be disabled if the player is connected to a device that does not support BD Wise.
